

## Caring For Your Stencil

### Cleaning

Do not let paint dry on your stencil. Keep a container of water nearby to place your stencil in. Gently rinse your stencil with water. Use soap if necessary. The shiny (film) side of the stencil softens when wet therefore care must be exercised to avoid scratching or rubbing off your design. The mesh side is much tougher. Soak your stencil in a latex paint remover, acetone or paint thinner to remove any stubborn paint. Place on a shop towel to dry. If several stencils get stuck together do not pull them apart. Soak the stencil in water for a few minutes until they come apart.

### Storage

**PhotoEZ™** shelf life is at least 6 months. Storing the film in your refrigerator will extend the shelf life to over one year.

- Keep undeveloped film in the black bag and store at normal room temperatures. For longer shelf life, store in cool locations such as a refrigerator.
- Store developed stencils flat, do not fold or bend. Once developed the stencil is no longer sensitive to light and may be stored in clear plastic bags or any suitable storage box.
- Ideal temperature range is 40° to 75 Fahrenheit.

### Safe Handling

Folks with sensitive skin should use rubber gloves when handling undeveloped film.

**PhotoEZ™** can tolerate a few minutes of exposure to light levels found in typical homes as long as it's kept several feet away from any artificial light sources and is protected from direct sunlight.

- Minimize exposure to fluorescent tubes. They emit more UV energy than incandescent bulbs.
- Illuminate work area with yellow bug lights (60 watts or less) if additional lighting/working time is desired. Fully developed stencils do not require protection from light.
- Do not remove protective clear backing until ready for use. Once backing is removed, handle the film from the edges only. Avoid putting fingerprints or scratching surface of photosensitive film.

## LIMITED PRODUCT WARRANTY

Circuit Bridge, LLC warrants to customers who purchased our products, that they will be free from defects in workmanship and materials at the time of purchase.

StencilPro™/PhotoEZ™ film is considered a consumable product and is warranted, at the time of sale, only against defects in workmanship or materials that prevent their use. Consumable products are goods reasonably expected to be used up or damaged during use.

Due to the nature of StencilPro™/PhotoEZ™, no warranty implied or otherwise is given to its suitability for any particular purpose or application.

This warranty only extends to the original Customer and cannot be transferred or assigned.

THE FOREGOING WARRANTY IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES NOT EXPRESSLY SET FORTH HEREIN, WHETHER EXPRESS OR IMPLIED, BY OPERATION OF LAW OR OTHERWISE, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

**LIMITATION OF LIABILITY.** CIRCUIT BRIDGE, LLC AND THIRD PARTY SUPPLIERS SHALL NOT BE LIABLE FOR ANY INCIDENTAL, SPECIAL OR CONSEQUENTIAL LOSSES, COSTS OR DAMAGES INCURRED BY BUYER OR OTHERS, DIRECTLY OR INDIRECTLY ARISING FROM THE HANDLING OR USE OF THE PRODUCTS OR FROM ANY OTHER CAUSE WITH RESPECT TO THE PRODUCTS OR THE FOREGOING WARRANTY, WHETHER SUCH CLAIM IS BASED UPON BREACH OF CONTRACT, BREACH OF WARRANTY, STRICT LIABILITY IN TORT, NEGLIGENCE OR ANY OTHER LEGAL THEORY (INCLUDING WITHOUT LIMITATION, LOST PROFITS, REVENUES, ANTICIPATED SALES, BUSINESS OPPORTUNITIES, GOODWILL, OR INTERRUPTION OF BUSINESS OR OTHER INJURY OR DAMAGE).

### CAUTION – LIGHT SENSITIVE MATERIAL!

Protect from excessive heat, freezing and high humidity. Open protective black bag under subdued lighting conditions only. Do not expose undeveloped film to UV or direct sunlight. Avoid exposure to bright artificial light sources especially from fluorescent tubes.

StencilPro™ and PhotoEZ™ are non-toxic and safe to handle, however, use rubber gloves when processing undeveloped product.

**FIRST AID** – Not recommended for children. Avoid ingestion.

**Eye contact** – Flush immediately with water for at least 15 minutes and contact a physician.

**Skin contact** – Wash skin with soap and water.

**Swallowing** – Do not induce vomiting. Consult a physician if persistent discomfort results.

Contains no hazardous ingredients by reference to the O.S.H.A. Hazard Communications Standard (29 CFR 1910.1200).

## Making Your Stencil

### Exposure Times:

Sunlight – 1 minute (Time may vary depending on conditions)

Eco Exposure Light – 15 minutes (Use times recommended for your unit).

### Step 1: SET UP

Remove protective film from PhotoEZ™.

Rub PhotoEZ™ over artwork.

Place black base over PhotoEZ™.

### Step 2: EXPOSE

Expose using Eco Exposure Light.

### Step 3: DEVELOP

Develop PhotoEZ™ in water.

Remove excess emulsion with brush.

### FINAL STEP

Dry PhotoEZ™ on plastic canvas.

## Using Your Stencil

### Step 1: POSITION STENCIL

Tape the edges of your PhotoEZ™ stencil.

### Step 2: APPLY INK/PAINT

Ink one edge of your PhotoEZ™ stencil.

Squeegee ink over PhotoEZ™ stencil.

### Step 3: REMOVE STENCIL

Carefully lift your PhotoEZ™ stencil.

### FINISH

Enjoy!
